

Hands-on Lab : Getting Started with Watson Studio

Estimated time needed: 20 minutes

IBM Watson Studio provides you with the environment and tools to solve problems by collaboratively working with data. You can choose the tools you need to analyze and visualize data, to cleanse and shape data, to ingest streaming data, or to create and train machine learning models.

Pre-requisite

You need an IBM Cloud account to create a project in Watson Studio. If you don't have an account created already, click and open this [link](#) and follow the instructions, to create an IBM Cloud account.

Objectives

After completing this lab, you will be able to:

- Use Watson Studio service
- Create project in Watson Studio
- Add an interactive python notebook to a project in Watson Studio

Exercise 1: Exercise - Create a project on Watson Studio

If you have not created a Watson service before proceed with Task 1, otherwise go to Task 2

Task 1: For New Users (with no Watson service):

1. [Click here](#) to go to the IBM Cloud Watson Studio page. To create a Watson service, choose a plan you want to use, click **Create**. In the image below, the *Lite* plan has been chosen.

1 authorized user

50 capacity unit-hours monthly limit

Environment = # of capacity units required per hour

- 1 vCPU + 4 GB RAM = 0.5
- 2 vCPU + 8 GB RAM = 1
- 4 vCPU + 16 GB RAM = 2
- Decision Optimization = Environment + 5

The Lite plan for Watson Studio offers everything you need to get started.

The Lite plan for Watson Studio offers everything you need to get started.

Lite plan services are deleted after 30 days of inactivity.

2. On the Watson Studio page, click on **Get Started**.

Exercise 2: Creating a Project

In this exercise, you will create a project.

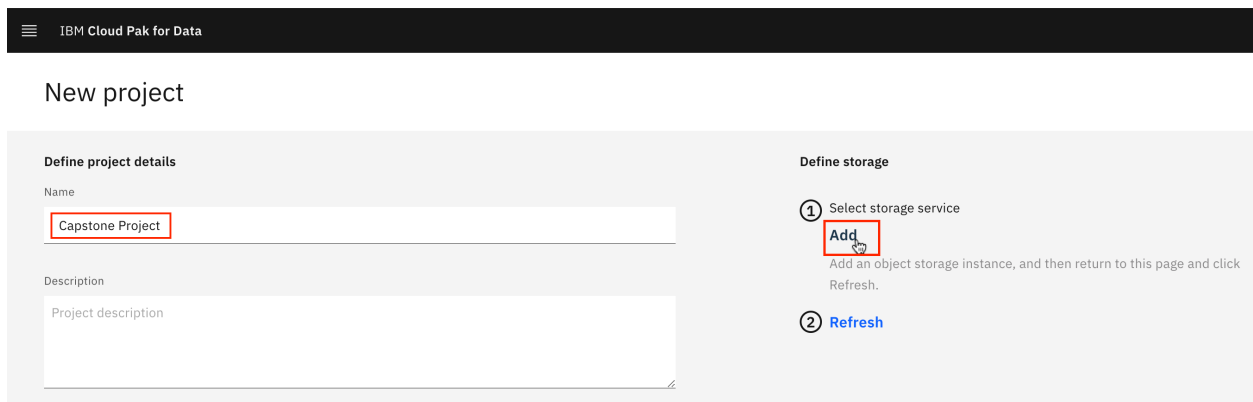

1. On the IBM Cloud Pak for Data welcome page, click **Create a project**.

2. Click **Create an empty project**.

3. Provide a **Project Name** and **Description** and click **Add** on Select storage service if no storage service appears. If a storage appears, proceed to step 6 directly.

4. You will be redirected to a new page. On the **Create** tab, select **Lite** plan. Then click **Create**.

7. You have successfully created a project. Click **IBM Cloud Pak for Data** at the top left to go back to homepage.

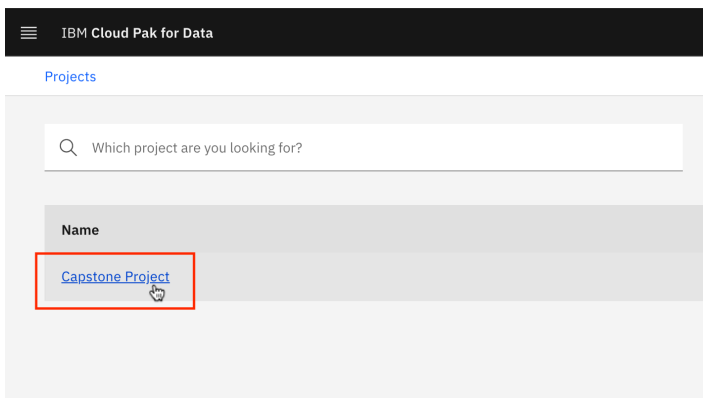

Exercise 3: Adding a Jupyter Notebook to the Project

In this exercise, you will add an IPYNB Jupyter notebook to the Project you created.

1. From IBM Cloud Pak for Data homepage, click **Projects** under Quick navigation.

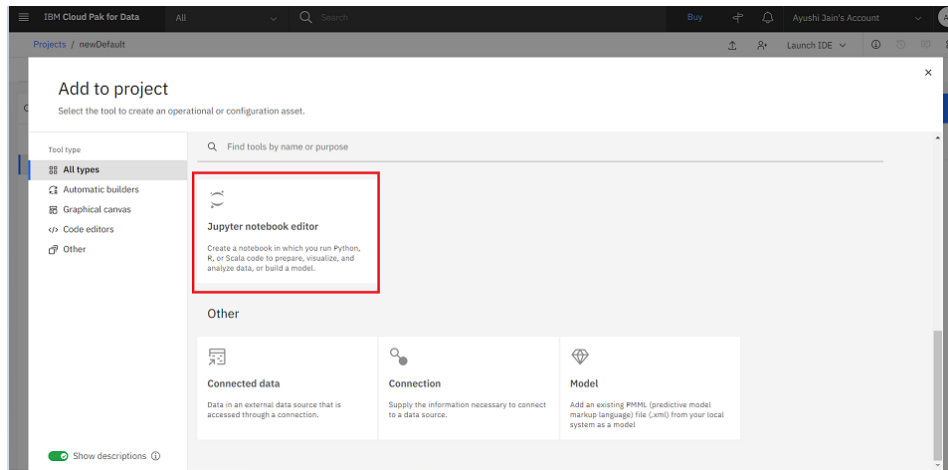

2. Select the project you created earlier.

3. On the **Overview** page of project, click **New asset**.

4. Select Notebook.

5. Right-click on this [Link](#) and copy the link address of the sample Jupyter notebook.

Under **From URL** tab, name the Notebook as **Sample Jupyter Notebook**. Then paste the link of the sample Jupyter notebook to **Notebook URL** you just copied.

Create

6. Wait until the notebook gets uploaded and become ready.

7. You have successfully added a Jupyter Notebook to the Project and opened it using Watson Studio. To share the notebook using permalink, click on the **Share** icon.

8. Click on the **toggle button** to turn on “Share with anyone who has the link”. Select **All content, including code** from Cell content. Click on the **copy link** icon to copy the “Permalink to view notebook” and share the link if you need to share your work on the notebook. This link always points to the most recent saved version of the notebook.

Share a read-only view of this notebook.

Share with anyone who has the link.

Cell content

- ☐ Only text and output
- ☐ All content excluding sensitive code cells
- ☒ All content, including code

ⓘ If your notebook includes credentials for data sources, you might want to remove such sensitive data from the notebook or hide it (see option 2). A version is saved for your notebook. The link always points to the most recent version of the notebook.
